

STRATEGIC PLANNING PROGRAMME SUMMARY 2019

In partnership with Valcare, Ezrah will again host 7 workshops during 2019 for eight identified Valcare members as part of our strategic planning programme after a very successful launch in 2018. The following organisations will participate in these workshops to learn new strategic planning skills in order to build their strategic planning frameworks for the next few years:

- Good Hope Day Care
- Elevation Programme
- Wamakersvallei Opleidingsentrum
- The Royalty Project
- Change within Development Consultancy
- Athlone House of Strength
- Care Career Connection NPC
- Fountain of Hope

Though many interactive training activities and peer learning, we will learn more about a wide range of topics and skills that will promote organisational sustainability in the long run. Specific topics that will be covered include risk assessment, leadership development, funding and income generation, teamwork, developing a theory of change and governance just to name a few. We are looking forward to hearing some great fruit stories of how our participating organisations will implement the skills learned. The programme will be concluded early in 2020.
